From 6070 with ❤

To Whom It May Concern,

FRC (FIRST® Robotics Competition) is an international robotics competition hosted by FIRST® (For Inspiration and Recognition of Science and Technology), where teams of high school students work during a six-week period to build a robot designed to perform various tasks and overcome specific challenges. These challenges change every year and have involved everything from shooting frisbees and balancing on seesaws to climbing ropes. The team has received numerous awards for both competing and community impact, consistently qualifying to compete at the provincial level and above since 2016. Glenforest's Robotics Team consists of students from across all grades, including International Baccalaureate and Academic streams. The team includes students of diverse cultural backgrounds and spoken languages, all of whom are dedicated, hardworking and passionate individuals, many of whom have the hope of pursuing a STEM career. Although the team meets for the whole school year, January through March 2024 will be dedicated to the design, build, and testing of the robot to meet this year's challenges.

As we begin a new season, we are encouraging more students and youth to get involved and hope to grow as a team and as individuals. Team 6070 Gryphon Machine is seeking your company/organisation's support in sponsoring our team for the upcoming 2023-2024 FRC Season. Your funds will be utilised solely for the purpose of event registration, robot construction, outreach contributions, and other team expenses, as disclosed in our financial breakdown. Your company is eligible to support us as a Bronze, Silver, Gold, Diamond or Platinum sponsor. Each level includes a number of promotional opportunities and recognition for your company/organization. Opportunities include verbal acknowledgement at competitions, a written acknowledgement in the form of signage, or distribution of marketing materials. Media promotion on our banners and websites is also possible. Further details are enclosed.

The Glenforest Team is poised to instil the visions of FIRST® and a future in STEM within our aspiring youth. With your help, the Glenforest Robotics Team will be able to compete and achieve in the 2024 FIRST® Robotics Competition.

About FIRST®

What is FIRST®?

The mission of FIRST® is to inspire young people to be science and technology leaders and innovators, by engaging them in exciting mentor-based programs that build science, engineering, and technology skills, that inspire innovation, and that foster well-rounded life capabilities including self-confidence, communication, and leadership.

The Ultimate Sport for the Mind

"Under strict rules and limited time and resources, teams of high school students are challenged to build industrial-size robots to play a difficult field game in alliance with other teams, while also fundraising to meet their goals, designing a team "brand," and advancing respect and appreciation for STEM within the local community."

When are competitions?

District Events: TBD; Past and Possible venues are McMaster University, Waterloo University, and Western University (edited)

District Championships: FIRST Ontario Centre, 101 York Boulevard, Hamilton, L8R 3L4

FIRST® Championships: TBD; past locations include Detroit, Michigan, and Houston, Texas

Pre-Season: September - January, 2024

Build-Season: January - February, 2024

Regionals: March - April, 2024

Districts: Mid - April, 2024

Worlds: Late - April, 2024

@frc6070

How you can help:

Monetary

You can provide financial aid that will go towards buying parts, community outreach events, subsidizing fees for students who might have trouble paying to attend competitions, and much more.

Products

You can provide product and good services such as printing merchandise, and/or providing safety equipment for the team.

Manufacturing

You can also help us with machining parts that we can't build due to the lack of access to intricate building machines in which cases we'll provide CAD models for you to manufacture.
